

XD6

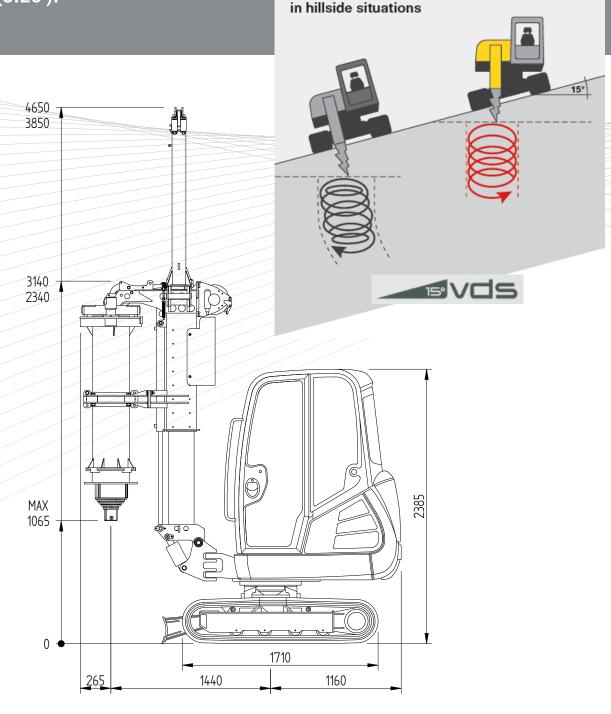

MINI PILING RIG

XD series machines are the smallest hydraulic piling rigs in the world. They are designed to work in extremely tight spaces, limited headroom and jobsites difficult to access for any other standard piling rig. The minimum working height is 2.6 m (8.5') and the minimum width 0.99 m (3.25').

Despite the compact size, the XD series is equipped with all the features of larger rigs, such as depth meter, spin off speed, auxiliary winch and winch limit switches.

The always perfect verticality is guaranteed by the combimation of the movements secured by the VDS Vertical Digging System, the blade and the hydraulic cylinder that tilt longitudinally the mast. A hydraulic cylinder and the interlocking Kelly bar provide the crowd force necessary to overcome harder soils.
